PREFERENCE SHARES. STEPS TO ISSUE, REDEEM AND CONVERT

COURSE INTRODUCTION

A company may raise working capital by the traditional way of issuing ordinary shares. However, the return on such investments may not be attractive enough for certain type of investors who would prefer fixed dividends and return of capital at an earlier period. Unlike ordinary shares, preference shares give the investors greater upside potential and a level of downside protection in return for their investments. The Companies (Amendment) Act 2019 (“the Act”) has introduced a new redemption method for preference shares i.e. redemption out of capital of the company which enables a company to redeem the preference shares even though there is insufficient profit. This proves advantageous as the company can still commit to the return of capital without the need to undertake a capital reduction exercise to return the preference capital.
