REMOTE WORKING -SECURITY CHALLENGES & SOLUTIONS

COURSE INTRODUCTION

In response to the COVID-19 pandemic, many organizations have shifted to Work From Home for the foreseeable future and some are operating with 60% to 50% staff working from home. It creates a situation ripe for cybercriminals and nation-state actors to exploit and we have been witnessing 600% raise in attacks as reported by many major cybersecurity threat reports. Security best practices often take a back seat to business continuity in strange times like these. Teams that previously managed a primarily in-house workforce are not prepared to combat new threats from a workplace without defined borders.

For security teams, the sudden change in an organization's network topology means a vastly expanded attack surface with little time / no time and additional security budget provided to adapt to the new reality. For employees, generally, it means having to be even more vigilant of potential attacks while all work is done via remote working and online meeting platforms.

REMOTE WORKING - SECURITY CHALLENGES & SOLUTIONS

COURSE OBJECTIVES

This course will introduce the security threats of remote working with Live demos and highlight the various defense and mitigation measures to keep the organization secure and cyber resilient.

COURSE CONTENTS

- GET READY! If you are connecting to your office network through VPN and RDP you are possibly piping malwares from remote system straight to the heart of your infrastructure! Learn how to defend.
- 2. PATCH MANAGEMENT POLICY & TECHNOLOGY
 - All employee machines may be exploitable since they may not be installing patches. Learn how to handle this to fix them now or you stand to lose the infrastructure to the hackers.
- 3. **SANITISING MACHINES!** For employees who are returning to office, do you have an onboarding policy / process to sanitize their machines? Learn what needs to be in the onboarding policy and how to get it implemented.
- 4. **BUSTING** Many covid19 attack driven malwares are sleeping in the machines waiting for a wake-up call. Do you have technologies to find them and eliminate them? Learn about the latest defences.
- 5. SECURE ONLINE MEETING As online meetings have become a part of our work life, do you have safe online meeting policy in place? Have you trained your employees? Learn how to conduct / participate in online meeting securely.

LEARNING OUTCOME

By attending this course, participants will be able:

- Understand how to defend your organisation and people from cyber-attacks related to remote working.
- Learn how to conduct / participate in online meeting securely.
- Understand the importance of Patch management, Anti-virus with EDR, monitor for attacks and implement proactive multi-layered security.

WHO SHOULD ATTEND

Open for all who work from anywhere.
